SUMMARY

Full Stack Developer specializing in React, Next.js, Node.js, TypeScript, and PostgreSQL. Experienced in building scalable web applications, developer tools, and SaaS platforms from concept to deployment. Strong foundation in API development, authentication, database design, background job processing, and modern full-stack architecture.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Background Jobs (BullMQ, Redis)

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, Supabase

Concepts: System Design, Authentication, Database Modeling, OAuth 2.0, JWT

Tools: Git, GitHub, Postman, Vercel, Render, Railway, GCP

EXPERIENCE

Frontend Engineering Intern

Sep 2025 – Feb 2026

ROI Makers — Remote

- Worked as sole frontend developer and built a complete business website from scratch using Next.js and TypeScript without an existing codebase.
- Achieved a 90+ Lighthouse performance score and reduced page load time by 40% using SSG, lazy loading, and image optimization techniques.
- Handled client communication independently and delivered responsive, production-ready UI across desktop and mobile platforms.

PROJECTS

KeyDrop — Secure Environment Variable Management Platform *keydrops.tech*

Node.js, TypeScript, CLI Development, REST APIs, SDK Engineering, PostgreSQL

- Built a developer tool that converts an entire .env file into a single secure deployment key, eliminating manual environment variable management across local development and production deployments.
- Developed a CLI, backend APIs, and runtime SDK to securely upload, retrieve, and inject secrets into applications, simplifying deployments for Node.js and modern web frameworks.

OpenContributors — Open Source Contribution Discovery Platform *opencontributors.vercel.app*

Next.js, TypeScript, PostgreSQL, Prisma ORM, GitHub API, BullMQ, Redis

- Built a platform that helps developers build a consistent open-source contribution habit by delivering curated GitHub issues from repositories they follow.
- Integrated GitHub APIs and automated daily issue digests using BullMQ workers and Redis, and developed subscription management with repository tracking and personalized recommendations.

Appliquo — AI-Powered Job Tracker & Resume Optimizer *appliquo.vercel.app*

React, Node.js, Express.js, PostgreSQL, Supabase, Gemini API, OAuth 2.0

- Built a full-stack job tracking platform with application tracker, resume vault, and career assistant as sole developer, from database design to deployment.
- Implemented OAuth 2.0 authentication, PostgreSQL row-level security, and secure CRUD REST APIs; integrated the Gemini API for resume feedback and cover letter generation.

CERTIFICATIONS

Crash Course on Python — Google via Coursera Mar 2026

ACHIEVEMENTS

- Solved 140+ Data Structures and Algorithms problems on LeetCode.
- Winner of 2 national-level hackathons, including Better Hack and Urja Hackathon, among 50+ competing teams.
- Organized Hackwave, drawing 300+ registrations and 50+ participating teams; active member of GDG and Echelon Dev Society, Indore.

EDUCATION

Chameli Devi Group of Institutions, Indore

Aug 2022 – May 2026

B.Tech in Computer Science and Engineering
